

President and CEO of altPOWER™ Inc. Honored by Association of Energy Engineers

Friday July 7, 2006

New York, NY - Anthony Pereira, President and CEO of altPOWER, a leading renewable energy firm in the Northeast, was recently honored by the New York Chapter of the Association of Energy Engineers(AEE) for his long history of accomplishments in the field. Pereira received the award for Energy Professional Development in a soiree at the New York Academy of Sciences on East 63rd street off 5th avenue. He was also nominated for an award from the national governing body of the AEE. Throughout the night there were continued references to some of the projects altPOWER has worked on, particularly the Solaire building in downtown Manhattan, America's first environmentally responsible high rise residential building. In his acceptance speech, Pereira credited family and colleagues for his success and pledged to continue working hard to further the spread of renewable energy across the globe.

About altPOWER Inc

altPOWER Inc was founded to provide expertise in the field of renewable energy with a focus on solar-electric systems, especially building integrated photovoltaics(BIPV) where solar panels are incorporated into the shell of new buildings. The market leader in New York City, altPOWER offers equipment supply, system design and installation, consulting services, feasibility/cost studies and other renewable energy services.
